

:: Installation & Commissioning

Remote Maintenance Technologies (RMT) maintains an expertise in a wide range of technologies and industries, providing for quality installations and thorough commissioning services. We have successfully installed, commissioned and currently support production systems for several major companies such as BNSF, Land O Lakes, Murphy Oil and Louisiana Pacific. RMT Service Engineers are factory trained on most process control devices, control systems, and communication networks; meet current safety requirements; maintain security clearance, and are fully equipped to support most production environments and operations. Installation & commissioning services are typically planned and managed through RMT's Support Central; including task assignments, resource scheduling, issue development & resolution, and information management. **RMT offers both fixed rate and T&M services to meet your installation requirements.**
